

Premium Patch

COMPOSITION

Vance Premium Patch is composed of a unique blend of mineral aggregates, polypropylene fibers, and a polymer modified asphalt emulsion.

PHYSICAL DATA

Vance Premium Patch is a durable, all weather, all temperature patching material which resembles "hot mix" in texture. Vance Premium Patch is a ready-to-use product that requires no tacking and can even be applied in a pothole with standing water in it.

APPLICATION

Thoroughly clean all rough and loose material from area to be patched. If possible, square sides and edges of hole. Pour material approximately 1/2" above existing surface, level material, and tamp firmly until level with old surface.

YIELD

5 square feet-1" deep per 5 gallon pail.

DRYING TIME

Immediately available to traffic.

CLEAN-UP

Patching tools may be cleaned with an approved solvent.

AVAILABILITY

5 gallon pails, 55 gallon drums and bulk quantities.

CAUTIONS

Do not apply less than 1" in depth.
