## PRODUCT INFORMATION

### ***Premium Patch*** *Polymerized Patching Material*

#### COMPOSITION

Vance Premium Patch is composed of a unique blend of mineral aggregates and polymer-modified cutback asphalt. Premium Patch is designed to have an extended stockpile life and outperform traditional cold mix asphalts.

#### PHYSICAL DATA

Vance Premium Patch is a durable, all-weather, all-temperature patching material which resembles hot mix asphalt in texture and appearance. Premium Patch is a ready-to-use product that requires no mixing or tacking. Premium Patch can even be applied in a pothole in which there is standing water unlike traditional patching materials.

#### SURFACE PREPARATION

Remove all loose and broken material from the area to be patched. If possible, square sides and edges of the hole with a pick or hammer and chisel. Safety glasses should be worn. Thoroughly clean edges and sides of hole with a broom or brush. No tacking or removal of standing water is necessary.

#### APPLICATION

Pour Vance Premium Patch straight from the container. No heating or mixing is necessary. The mix should be poured above the level of the pavement for compaction by a ratio of 1/4" per 1" depth of hole being filled. Tamp firmly with an asphalt tamp or drive automobile back and forth over the patch. For best results, store mix in temperatures above 50° F. Area may be open to traffic immediately after compacting. Do not apply less than 1" in depth.

#### CAUTIONS
